## Configuration:

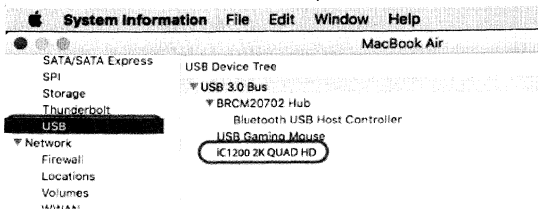

### 1. Setting up your webcam

Connect webcam to your computer's USB port;

### 2. For Mac OS X Users

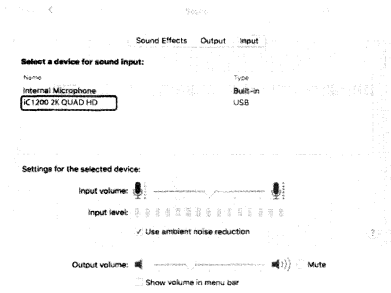

#### a). Installation

The webcam will be automatically installed when you connect it to a Mac. To check if the webcam is successfully installed or not, you may click the "Apple" menu > "About this Mac" > "System Report" > "USB", and check if it's shown as "iC1200 2K QUAD HD" as in below picture.

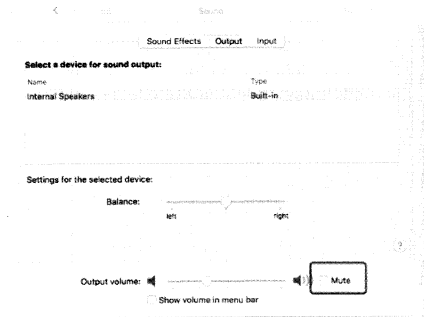

#### b). Audio Setting

In Mac OS X, open "System Preferences" > select "Sound" > "Input" > "Select Sound Input Device" > select "iC1200 2K QUAD HD" as the default sound input device.

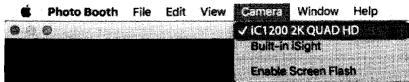

In Mac OS X, open "System Preferences" > select "Sound" > "Output" > "Output Volume" > uncheck "Mute" and adjust the system speaker volume to a medium level.

### c). Photo Booth

For video recording, please open Photo Booth which is preinstalled on all Macs as standard. Click "Camera" > "iC1200 2K QUAD HD" to use this webcam.

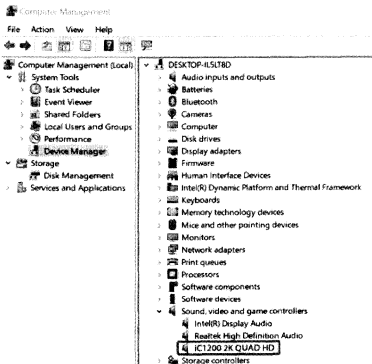

### 3. For Windows Users

#### a). Installation

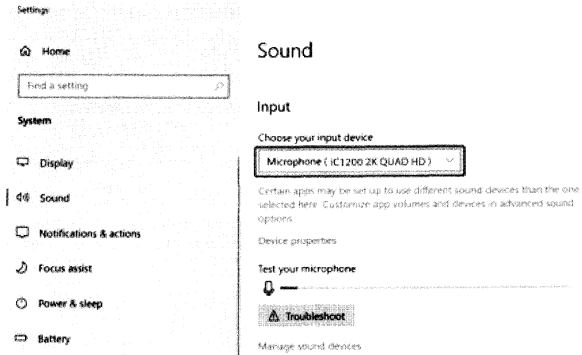

The Web Camera will be automatically installed when you connect it to a Windows system.

To check if the webcam is successfully installed (in Win10), you may click right on "Computer" > "Manage" > "Device Manager" > "Sound, video and game controllers", and check if it's shown as "iC1200 2K QUAD HD " as in below picture.

### b). Audio Setting

In Mac OS X, open "System Preferences" > select "Sound" > "Input" > "Select Sound Input Device" > select "iC1200 2K QUAD HD" as the default sound input device.

### c). Video Setting

Under Windows XP and Windows 7 system, 3rd party application is required for video recording function.

Note:

Good network connection is required during video call, or reduces the video resolution in case the video is lagging.
